

Bio for Stagg Hill Board.

Steve Preston

1265 A Ave Dwight KS

I am a graduate of Kansas State University in Mechanical Engineering and Computer Science. While at K-State I played baseball for the Cats.

My wife Sandy and I have been Manhattan residents for most of the last 40 years. We recently moved south of town into the countryside. Our daughter, SIL, and 3 grandchildren live on the property as well. Our son, DIL and one grandchild live in KC.

I recently retired from Parker Hannifin after 40 years with the company. During that time, I held multiple positions including Plant Manager, Production Control Manager and Engineering Manager.

Sandy and I are avid golfers and love to compete in tournaments. We both are impressed with the recent improvements to the Stagg Hill course and hope to see this trend continue.

I would bring a manager's point of view to the board if I were to be accepted.

Best Regards

Steve Preston
